--

Dear Sir,

I am writing regarding the proposed settlement between Microsoft and The US Dept. Of Justice.

I find it totally unacceptable to not put Microsoft in a position where it is unable to pursue the immoral and unethical business practices that it has shown itself prone to. I read the findings of fact that were released by the judge months ago, and was dumbfounded that any company could get away with the actions that Microsoft took.

Anyone involved with the case should re-read these statements of fact that show Microsoft as a monopolistic predator with almost unlimited power. A viewing of the video taped depositions of Bill Gates would convince anyone of the 100% sleaze of Gates and Microsoft. They will do anything to increase their power if left unchecked.

Please take the appropriate measures to remedy the situation. Microsoft should be broken into smaller companies that do not have a death grip on the tech market. If this is too drastic, at least do something that makes a difference and restores competition.

Sincerely,

brogovin@fuse.net
